

Geared towards those with little to no knowledge of Hepatitis, this workshop provides a basic understanding of Hepatitis A, B, and C - the symptoms, transmission routes, testing, and treatment options.

This workshop is adaptable to suit various populations. Possible venues include community organizations, jr/sr high schools, businesses, government organizations, or other organizations/groups with an interest in Hepatitis.

Ideally, the Hepatitis 101 workshop is delivered to a group of eight to thirty participants. However, seminar style workshops can be provided for larger groups of participants.

This workshop is designed to run between 50 and 75 minutes.

*"I really didn't know anything about Hepatitis before taking this workshop. I am much more informed now, and I think that I will feel much more comfortable being around people with Hep C." - Carrie W.*

Fees for the Hepatitis 101 Workshop are negotiable. Please contact HepNS for pricing and availability.
